

Please leave our XM radio alone. My wife and I are truck drivers and travel back and forth across the county and enjoy listening to it. We can set it when we leave home and forget it. When we get into CA we know ahead what the traffic is like without listening to 20min of commercials and 10 sec of traffic. If anything XM should be considered a BIG safety factor  
I'm sure the government has a lot more important things to do than to mess in my personal business. So LEAVE our XM alone
